

Think About It

Solve using tens and ones table.

1. Shirley had 13 dolls. Her mom gave her 5 more dolls. How many dolls does Shirley now have? _____
2. Andy's mom bought 25 eggs on Monday. She bought 13 eggs on Wednesday. How many eggs does she have in all? _____
3. Rosa has 16 balloons. Joseph has 3 balloons. How many balloons do they have altogether? _____
4. Kay-Lee had 25 pencils. She bought 4 more pencils. How many pencils has she altogether? _____
5. Anna has 10 beads. Sharon has 9 more than Anna. How many beads do they have in all? _____
6. My mom gave me 14 June plums. My dad gave me 12 June plums. How many June plums do I have now? _____
7. 24 students in class 2B came to school on Monday. 23 students came to school on Tuesday. How many students came to school on both days? _____

Expanded Notation

OBJECTIVE: Represent the value of numbers using expanded notation.

EXPANDING NUMBERS

When we expand a number, we group the number showing the correct place value.

Example: $48 = 4 \text{ tens and } 8 \text{ ones}$
or $40 + 8 = 48$
or $10 + 10 + 10 + 10 + 8 = 48$

Expand the following: The first one has been done for you.

1. $75 = 70 + 5$
or $10 + 10 + 10 + 10 + 10 + 10 + 10 + 5$
or $7 \text{ tens and } 5 \text{ ones}$

2. $32 =$

3. $49 =$

4. $57 =$

5. $99 =$

6. $78 =$

EXPANDED NOTATION

7. $44 =$

8. $88 =$

9. $53 =$

EXPANDING NUMBERS IN THE HUNDREDS

Example: $237 =$ 2 hundreds 3 tens and 7 ones
or $200 + 30 + 7 = 237$

Activity:

Expand the following:

1. $158 =$

2. $360 =$

3. $849 =$

4. $676 =$

5. $795 =$

6. $448 =$

Measurement

OBJECTIVE: Exploring/Introduction to litres.

CAPACITY: LITRES

When we want to measure liquids, they are measured in litres and millilitres.

The shortened form of writing litres is L.

The liquid measuring cup is the instrument used for measuring liquids.

SCALE

1 litre (l) = 1000 millilitres (ml)

1 kilolitre (kl) = 1000 litres (l)

4 liquid measuring cups = 1 litre

+

=

2 liquid measuring cups = $\frac{1}{2}$ litre

MEASUREMENT

OBJECTIVE: Confirming estimation.

Let us read

- Get a litre container. Collect empty soda bottles, paper cups.
- How many of each will fill the litre container?
- Write down your guess or estimate.
- After you have completed your estimates having used all the containers, empty the litre container.
- Start all over again, filling each container with water and emptying it in the litre container. Write down the actual amount that fills the litre container.

Container	Guess/ Estimate	Actual Measurement

How many litres in all?

12 L 4 L

8 L 3 L 2 L 1 L

OBJECTIVE: Measuring and identifying objects measured in litre.

Activity:

Circle the ones that can be measured in litres.

Put the following in the order from least to most.

1. 7L 9L 5L 6L 4L

2. 3L 7L 4L 8L 6L

Put the following in the order from most to least.

1. 5 litres 2 litres 3 litres 9 litres

2. 8 litres 3 litres 4 litres 6 litres

MEASUREMENT

OBJECTIVE: Showing the difference between litres and millilitres.

MEASURING IN MILLILITRES AND LITRES

Liquids are measured in litres and millilitres.

We write L for litre and ml for millilitres.

1L = 1 litre 1ml = 1 millilitre

A

B

Bottle **A** has less water than bottle **B**.

Bottle **B** has more water than bottle **A**.

The amount (volume) of water in bottle **A** is less than the amount (volume) of water in bottle **B**.

Note: The amount of any liquid that is in a container is called the volume of the liquid. The litre and millilitre are used to measure the volume of a liquid.

MEASUREMENT

Collect bottles or juice boxes that have labels and write the unit of measurement that is seen.

Items Collected	Unit of Measurement
Example: Lider Vegetable Cooking Oil	250 ml
1.	
2.	
3.	

1. What does the measurement on the label tell us?

2. Which unit of measurement is used for a large amount of liquid? _____

The bucket has 5 litres of lemonade. The jug has 2 litres of lemonade. Which container has the greater amount (volume) of lemonade?

The _____ has the greater amount (volume) of lemonade.

MEASUREMENT

The water in these containers is used to fill up these mugs.

Answer these questions.

1. How many more mugs of water are there in container C than in container A.
2. There are _____ fewer mugs of water in container A than in container B.
3. Which container has the most amount of liquid? _____
4. Which container has the least amount of liquid? _____

Note: Remember that the unit of measurement for liquids is the litre and millilitre.

VOLUME

Which container has more water?

A

B

C

D

The amount of water is called the volume of water.

Activity:

1. In the above illustrations, which container has the greatest volume of water?

2. Which container has the least volume of water?

Volume of water =
4L or 4 litres

3.

Volume of water =

_____ or _____

4. Fill in the blanks.

The volume of water in the jug is
_____ L.

MEASUREMENT

5. Fill in the blank.

These containers have _____ L
of water altogether.

6. There were 75L of juice in the pail. Tyrone's mom gave her neighbour 50L of the juice. How many litres of juice was left?

7. Mr. Jones sold 56L of milk on Monday and 68L of milk on Tuesday. How much more milk was sold on Tuesday than on Monday.

8. Our neighbour's tank had in 38L of water. Ivan filled it up with another 26L of water. How much water does the tank now have?

Activity:

Select the unit (metre, centimetre, litre, kilogram, gram) which is best used to measure the following items?

Money

OBJECTIVE: Identify the value of Jamaican coins and notes.

JAMAICAN MONEY (THEN AND NOW)

100¢ cents = J\$ 1 dollar (\$1.00)

Jamaican Coins

Whose faces are on these Jamaican coins?

\$20	_____	\$1	_____
\$10	_____	25¢	_____
\$5	_____	10¢	_____

MONEY

Jamaican Notes

Whose portraits are on these Jamaican notes?

\$50 _____ \$1,000 _____

\$100 _____ \$2,000 _____

\$500 _____ \$5,000 _____

Are all the people on the Jamaican notes heroes? _____

Which persons are not heroes? _____

OBJECTIVE: Showing the values of different combinations of notes and coins.

MONEY

AMOUNTS OF MONEY

What is the amount of money in each set?
Write the answers in the boxes.

Look at the prices of the items below. Compare them.

\$36.80¢

\$84.30¢

\$60.00

\$25.50¢

- Which item costs the most? _____
- Which two items together cost \$85.50¢? _____
- Which item costs the least? _____
- The teddy bear costs \$84.30¢ and the ice cream costs \$25.50¢.
What is the total cost of both items? _____

MONEY

How many 5¢ and 10¢ make up the following?

$$10¢ = \textcircled{10¢}$$

$$20¢ = \textcircled{10¢} + \textcircled{10¢}$$

$$25¢ = \textcircled{10¢} + \textcircled{10¢} + \textcircled{5¢}$$

$$30¢ =$$

$$45¢ =$$

$$60¢ =$$

$$75¢ =$$

$$85¢ =$$

Add the following. One has been done for you.

1. $40¢ + 10¢ = \underline{50¢}$

6. $20¢ + 20¢ = \underline{\hspace{2cm}}$

2. $18¢ + 11¢ = \underline{\hspace{2cm}}$

7. $70¢ + 20¢ = \underline{\hspace{2cm}}$

3. $13¢ + 14¢ + 2¢ = \underline{\hspace{2cm}}$

8. $35¢ + 40¢ = \underline{\hspace{2cm}}$

4. $25¢ + 25¢ = \underline{\hspace{2cm}}$

9. $9¢ + 3¢ + 5¢ = \underline{\hspace{2cm}}$

5. $12¢ + 7¢ + 10¢ = \underline{\hspace{2cm}}$

10. $16¢ + 4¢ = \underline{\hspace{2cm}}$

OBJECTIVE: Demonstrate an understanding of the use and value of money.

LET'S GO SHOPPING

To the Market

(doz = dozen / kg = kilogram)

oranges	\$150/doz
Irish potatoes	\$40/kg
callaloo	\$50 bunch
yam	\$40/kg
grapefruit	\$200/doz.
pak choi	\$50/kg
sweet peppers	\$60/kg
sweet potatoes	\$40/kg
cabbage	\$50/kg
plantain	\$50/each
peppers	\$70/doz.
green bananas	\$100/doz.
onions	\$30/kg
ripe bananas	\$100/kg
cho chos	3 for \$80
garlic	\$50
escallion	\$60/kg
carrots	\$40/kg
tomatoes	\$85/kg

Example:

AMOUNT	ITEMS	COST
1 kg	yam	\$40.00
1 kg	tomatoes	\$85.00
1 doz	ripe bananas	\$100.00
	TOTAL COST	\$225.00

MONEY

OBJECTIVE: Associating weight with money.

Look at the cost of these items on **page 133**. Fill in the cost for each.

Now do these:

AMOUNT	ITEMS	COST
1 kg	sweet	
1 kg	Irish potatoes	
1 kg	tomatoes	
	TOTAL COST	

AMOUNT	ITEMS	COST
1 kg	Irish potatoes	
1 kg	cabbage	
1 kg	onions	
1 kg	carrot	
	TOTAL COST	

AMOUNT	ITEMS	COST
1 kg	Irish potatoes	
1 doz	oranges	
1 kg	cabbage	
	TOTAL COST	

AMOUNT	ITEMS	COST
1 doz	grapefruit	
1 kg	carrot	
1 kg	cabbage	
	TOTAL COST	

- 3 dozen green bananas cost _____.
- 6 cho chos cost _____.
- 2 dozen grapefruits cost _____.
- 2 kilograms (kg) of Irish potatoes cost _____.
- What is the total cost of 1 kg sweet potatoes and 1 kg Irish potatoes?

- My mom bought 1 dozen green bananas, 1 kg Irish potatoes, 1 kg yam, 1 kg carrots. She gave the seller \$500. How much change should she get back? _____

Measurement

October 8, 2025

OBJECTIVE: Read an analog clock and tell time in hours and minutes.

TELLING TIME

BY THE HOUR

It is 3 o'clock.

What time is it?

Most clocks have two hands, the minute hand and the hour hand. Some clocks have three hands. This third hand tells the seconds.

The long hand is the minute hand and it tells the minutes. The short hand is the hour hand and it tells the hour.

When the minute hand points to 12 and the hour hand points to a particular number, the time is that hour.

MEASUREMENT

Look at the examples.

Long hand is on 12,
short hand is on 2.

The time is 2 o'clock.

Long hand is on 12,
short hand is on 5.

The time is 5 o'clock.

Long hand is on 12,
short hand is on 8.

The time is 8 o'clock.

Write the times on these clocks.

1:00 or 1 o'clock

4:00 or 4 o'clock

2:00 or 2 o'clock

10:00 or 10 o'clock

7:00 or 7 o'clock

6:00 or 6 o'clock

TELLING TIME AT HALF HOUR

2:30 or half past 2

8:30 or half past 8

11:30 or half past 11

When the long hand (the minute hand) points to 6, the long hand is saying "half past" the hour. The short hand (the hour hand) is between numerals. The time will be half past the hour just passed.

Do these.

9:30 or half past 9

7:30 or half past 7

4:30 or half past 4

8:30 or half past 8

5:30 or half past 5

1:30 or half past 1

MEASUREMENT

1. Grade 2 students at Kareem's school get half an hour for break. If they go for break at 10:30, at what time should the bell ring for the students to return to class? _____
2. School ends at 2 o'clock each day. The boys go to football practice for two hours. At what time do they finish? _____
3. We have lunch at 12 o'clock each day. Lunch time is for one hour. At what time is lunch time finished? _____
4. I leave for school at half past 6 o'clock and arrive at school at 7 o'clock. How long does it take me to get to school? _____
5. What times are shown on the clocks? _____

6. Tricia gets up at 6 o'clock in the morning to go to school. She spends half an hour in the bathroom. At what time does she get out of the bathroom? _____
7. My mom loves to bake cookies and cakes. She makes some cookies and places them in the oven at 4 o'clock. She bakes the cookies for one hour. At what time does she remove the cookies from the oven? _____
8. The time is now 3 o'clock. What time will it be three hours from now? _____
9. If John arrives at 10 o'clock, what time will it be two hours from now? _____
10. Mark woke up at 5 o'clock. He took a shower for half an hour. What time did he finish bathing? _____

Money

OBJECTIVE: Adding money in dollars and cents.

ADDITION OF MONEY (WITHOUT RENAMING)

When we are adding money, we add the cents first, then we add the dollars.

¢ – this is the symbol for cents.

\$ – this is the symbol for dollars

(100 ¢ make \$1.00 – one hundred cents make one dollar)

Note: Remember that when we add we keep putting objects or things together.

Money is written as a decimal with dollars to the left of the decimal point and cents to the right of the decimal point.

Diagram illustrating the addition of money in dollars and cents:

Labels: dollar symbol (\$), decimal point, cent symbol (¢)

$$\begin{array}{r} \$10.34 \\ + \$56.12 \\ \hline \$66.46 \end{array}$$

Add these: Add the cents column first.

$$\begin{array}{r} \$71.25 \\ + \$10.14 \\ \hline \end{array}$$

$$\begin{array}{r} \$64.42 \\ + \$00.23 \\ \hline \end{array}$$

$$\begin{array}{r} \$20.00 \\ + \$35.65 \\ \hline \end{array}$$

$$\begin{array}{r} \$40.10 \\ + \$13.15 \\ \hline \end{array}$$

$$\begin{array}{r} \$62.25 \\ + \$37.00 \\ \hline \end{array}$$

$$\begin{array}{r} \$09.22 \\ + \$80.15 \\ \hline \end{array}$$

$$\begin{array}{r} \$83.15 \\ + \$10.23 \\ \hline \end{array}$$

$$\begin{array}{r} \$21.14 \\ + \$56.25 \\ \hline \end{array}$$

Study the example:

$$\$2.45¢ + \$6.30¢ = \underline{\hspace{2cm}}$$

1. Place the dots or points under each other.
2. Place the numerals correctly under each other.
3. Place the \$ sign and the dot in the answer.

Add

$$\begin{array}{r} \$2.45¢ \\ + \$6.30¢ \\ \hline \$8.75¢ \end{array}$$

Work these.

$$\begin{array}{r} \$2.67 \\ + \$1.31 \\ \hline \end{array}$$

$$\begin{array}{r} \$3.14 \\ + \$6.25 \\ \hline \end{array}$$

$$\begin{array}{r} \$0.28 \\ + \$9.61 \\ \hline \end{array}$$

$$\begin{array}{r} \$5.26 \\ + \$4.43 \\ \hline \end{array}$$

$$\begin{array}{r} \$6.04 \\ + \$3.03 \\ \hline \end{array}$$

$$\begin{array}{r} \$2.16 \\ + \$5.12 \\ \hline \end{array}$$

$$\begin{array}{r} \$4.03 \\ + \$4.21 \\ \hline \end{array}$$

$$\begin{array}{r} \$3.50 \\ + \$3.41 \\ \hline \end{array}$$

What is...?

1. $\$3.15 + \$4.10 = \underline{\hspace{2cm}}$

2. $\$7.44 + \$2.40 = \underline{\hspace{2cm}}$

3. $\$5.60 + \$4.25 = \underline{\hspace{2cm}}$

4. $\$6.56 + \$3.11 = \underline{\hspace{2cm}}$

5. $\$7.80 + \$2.10 = \underline{\hspace{2cm}}$

6. $\$8.00 + \$1.60 = \underline{\hspace{2cm}}$

SUBTRACTION OF MONEY

(WITHOUT RENAMING)

When we are subtracting money, subtract the cents first, then subtract the dollars next.

decimal point

dollar column → \$ ¢ ← cent column

$$\begin{array}{r} 36.74 \\ - 13.32 \\ \hline \$23.42 \end{array}$$

Subtract these.

$$\begin{array}{r} \$ \quad \text{¢} \\ 43.96 \\ - 21.25 \\ \hline \end{array}$$

$$\begin{array}{r} \$ \quad \text{¢} \\ 9.38 \\ - 6.17 \\ \hline \end{array}$$

$$\begin{array}{r} \$ \quad \text{¢} \\ 8.88 \\ - 6.23 \\ \hline \end{array}$$

$$\begin{array}{r} \$ \quad \text{¢} \\ 25.19 \\ - 13.15 \\ \hline \end{array}$$

$$\begin{array}{r} \$ \quad \text{¢} \\ 57.65 \\ - 32.31 \\ \hline \end{array}$$

$$\begin{array}{r} \$ \quad \text{¢} \\ 76.57 \\ - 51.24 \\ \hline \end{array}$$

$$\begin{array}{r} \$ \quad \text{¢} \\ 66.80 \\ - 34.70 \\ \hline \end{array}$$

$$\begin{array}{r} \$ \quad \text{¢} \\ 40.20 \\ - 30.20 \\ \hline \end{array}$$

SUBTRACTION OF MONEY

(REGROUPING/RENAMING)

$$\begin{array}{r} \$ \quad \text{¢} \\ 28.41 \\ - 12.25 \\ \hline \end{array}$$

$$\begin{array}{r} \$ \quad \text{¢} \\ 5.75 \\ - 3.26 \\ \hline \end{array}$$

$$\begin{array}{r} \$ \quad \text{¢} \\ 80.47 \\ - 37.18 \\ \hline \end{array}$$

$$\begin{array}{r} \$ \quad \text{¢} \\ 99.53 \\ - 18.27 \\ \hline \end{array}$$

MONEY

OBJECTIVE: Calculating the cost of items.

pencil
\$2.50

ruler
\$5.00

rubber/eraser
\$8.00

crayons
\$70.00

sharpener
\$45.00

James bought 1 ruler, 1 rubber/eraser, 2 pencils at the store.

He paid with \$20. How much change should he receive?

James received this bill with his change. Is the bill correct? Give the total cost of the items.

BILL: 0001		
Name: <u>James</u>		Date: <u>March 10, 2014</u>
Quantity	Description	Total
1	ruler	\$5.00
1	rubber/eraser	\$8.00
2	pencils	\$5.00
Total		

SHOPPING

OBJECTIVE: Repeated addition using money.

eraser
\$12.00

pencil
\$5.00

pack of
crayons
\$30.00

sharpener
\$15.00

Exercise
Book
\$40.00

ruler
\$20.00

glue
\$50.00

John wants to buy 3 erasers. How much money must he spend? _____

I buy one pencil for \$5.00 and one eraser for \$12.00. How much money do I spend in all?

My teacher sent me to the bookstore with \$50.00 to buy a pencil and 1 pack of crayons. How much change should I receive? _____

The cost of one pack of crayons is \$30.00. The cost of 3 packs of crayons is? _____

One sharpener costs \$15.00. How many sharpeners can I buy with \$30.00? _____

Kimani bought a pack of crayons, 2 pencils and an eraser. How much did he spend? _____

One exercise book costs \$40.00. How many exercise books can I buy with \$80.00? _____

I want to buy 3 rulers. How much must I spend if one ruler costs \$20.00? _____

My mom bought 2 bottles of glue. How much did she pay? _____

Desiree bought a bottle of glue and an exercise book. She paid with \$100. How much change should she receive? _____

MONEY

1. Kimani buys 1 box of orange juice and 1 milk. He pays with \$100. How much change should he get? _____

2.  +  = \$ _____	5.  +  = \$ _____
3.  +  = \$ _____	6.  +  = \$ _____
4.  +  = \$ _____	

Write in figures.

- Nine dollars and six cents _____
- Seven dollars and eight cents _____
- Five dollars _____
- Five cents _____
- Four dollars and thirty-four cents _____
- Nine cents _____
- Sixty-two cents _____
- Fifteen dollars and thirty-five cents _____
- Twenty-three dollars and sixty-eight cents _____

REMEMBER:

MONEY

Adding money

We add money the same way we add whole numbers.

Example: Tom buys 1 pineapple for \$225 and 3 coconuts for \$300.

How much does he have to pay?

$$\begin{array}{r} \$ 138 \\ + \$ 421 \\ \hline \$ 559 \end{array}$$

$$\$225 + \$300 = \$525$$

Activity:

Add the following amounts of money.

1.

3.

$$\$180 + \$320 = \underline{\hspace{2cm}}$$

$$\$520 + \$200 = \underline{\hspace{2cm}}$$

2.

$$\$260 + \$400 + \$140 = \underline{\hspace{2cm}}$$

Activity:

How much money?

a)

b)

MONEY

c)    

d)  

e)   

f)     

Can you change this  note in a different way?

REMEMBER:

Subtraction of Money

We subtract money the same way we subtract whole numbers.

$$\begin{array}{r} \$ 602 \\ + \$ 401 \\ \hline \$ 201 \end{array}$$

Activity:

Subtract the following.

a) Kevin goes to the store to buy two dozen bananas. He gives the seller \$500. How much change should he receive?

b) Susan goes to the store to buy tomatoes and cabbage. She has \$150. How much more does she need in order to buy the items?

c) How much less do the tomatoes cost than the bananas?

What is the total value of the notes and coins shown?

a)  +  +  +  = _____

b)  +  +  +  = _____

c)  +  +  +  +  = _____

John has one \$50 note and four \$1 coins in his pocket.

How much does he have in all?

Activity:

Write in dollars.

a) 330¢ = \$ _____

c) 128¢ = \$ _____

b) 174¢ = \$ _____

d) 230¢ = \$ _____

OBJECTIVE: Changing cents to dollars.

CHANGING CENTS AND DOLLARS

We can change dollars to cents, $\$1 = 100\text{¢}$

$$\begin{aligned} \$1 + 10\text{¢} + 10\text{¢} &= \$1.20 \\ &\text{or } 120\text{¢} \end{aligned}$$

We say one dollar and twenty cents.

We can write $\$1.20$ or 120¢ .

We can always change cents to dollars, $100\text{¢} = \$1$

$$50\text{¢} \quad 10\text{¢} \quad 10\text{¢} \quad 5\text{¢} = \text{seventy-five cents}$$

$$75\text{¢} \text{ or } \$0.75$$

If there are no dollars,
put a zero before the dot.

$$50\text{¢} \quad 50\text{¢} \quad 10\text{¢} \quad 10\text{¢} \quad 5\text{¢} = \text{one hundred and twenty-five cents}$$

Remember $100\text{¢} = \$1$

¢ or \$

Activity:

Write in cents.

a. $\$0.73 =$ _____

c. $\$4.07 =$ _____

b. $\$3.00 =$ _____

d. $\$1.36 =$ _____

OBJECTIVE: Comparing money.

COMPARING AMOUNTS OF MONEY

Which amount is smaller?

	DOLLARS	CENTS
\$34.40	34	40
\$47.15	47	15

We first compare the dollars.

34 is smaller than 47.

\$34.40 is the smaller amount.

\$47.15 is the greater amount.

Which amount is greater?

	DOLLARS	CENTS
\$53.30	53	30
\$53.85	53	85

We first compare the dollars. They are the same.

Compare the cents. 85 is greater than 30.

\$ is the greater amount.

\$ is the smaller amount.

Which amount is greatest?

Which amount is smallest?

	DOLLARS	CENTS
\$70.45	70	45
\$70.90	70	90
\$68.85	68	85

First compare the dollars. Then compare the cents.

\$ is the greatest amount.

\$ is the smallest amount.

Subtraction

June 23, 2026

OBJECTIVE: Using objects to show subtract.

SUBTRACTION, TAKE AWAY, MINUS, FINDING THE DIFFERENCE

In subtraction we always take away (subtract) the smaller number from the greater number.

Note: $25 - 13 =$

T	O
2	5
- 1	3
1	2

9

-

4

= 5

12

-

0

= 12

MONEY

Activity:

Compare the amounts and fill in the blanks.

	DOLLARS	CENTS
\$1.80	1	80
\$3.70	3	70

\$ is the greater amount.

\$ is the smaller amount.

	DOLLARS	CENTS
\$5.73	5	73
\$5.58	5	58

\$ is the greater amount.

\$ is the smaller amount.

	DOLLARS	CENTS
\$7.85	7	85
\$8.65	8	65
\$8.40	8	40

\$ is the greatest amount.

\$ is the smallest amount.

Compare the amounts of money. Which one is greater?

- a. \$42.37 \$40.30 c. \$54.15 \$55.25
- b. \$18.23 \$28.23 d. \$36.42 \$36.41

Subtract.

- a. \$1 - 20¢ = _____
- b. \$1 - 50¢ = _____
- c. \$1 - 45¢ = _____
- d. \$1 - 70¢ = _____

Joanna had \$53. William had \$26.
How much did they have in all?

Kerene spent \$45 on ice-cream.
She spent \$60 on cupcakes.
How much did Kerene spend altogether?

OBJECTIVE: Subtraction without renaming.

Solve the following:

1. $40 - 5 = \underline{36}$

11. $14 - 4 = \underline{10}$

2. $13 - 3 = \underline{10}$

12. $20 - 3 = \underline{16}$

3. $28 - 0 = \underline{28}$

13. $16 - 3 = \underline{13}$

4. $12 - 8 = \underline{4}$

14. $20 - 0 = \underline{20}$

5. $19 - 1 = \underline{18}$

15. $28 - 2 = \underline{17}$

6. $17 - 5 = \underline{12}$

16. $4 - 2 = \underline{2}$

7. $17 - 3 = \underline{14}$

17. $23 - 10 = \underline{13}$

8. $18 - 5 = \underline{13}$

18. $15 - 5 = \underline{10}$

9. $38 - 2 = \underline{36}$

19. $10 - 4 = \underline{6}$

10. $49 - 4 = \underline{45}$

20. $7 - 0 = \underline{7}$

SUBTRACTION

OBJECTIVE: Using the number line to subtract.

SUBTRACTING (TAKING AWAY) USING THE NUMBER LINE 0 – 20

$$13 - 5 = \underline{\quad}$$

Using the number line, start at 0 and move to 13.
Next, move backwards 5 places counting on in ones.

We end up at 8. $13 - 5 = 8$

Write $13 - 5 = 8$

Complete the subtraction by using the number lines.

$$15 - 5 = \underline{\quad}$$

$$20 - 9 = \underline{\quad}$$

$$16 - 7 = \underline{\quad}$$

$$18 - 3 = \underline{\quad}$$

$$14 - 4 = \underline{\quad}$$

$$18 - 6 = \underline{\quad}$$

Use the number line to solve these problems.

1. $15 - 2 = \underline{\quad}$

7. $9 - 0 = \underline{\quad}$

2. $16 - 0 = \underline{\quad}$

8. $20 - 2 = \underline{\quad}$

3. $11 - 3 = \underline{\quad}$

9. $17 - 5 = \underline{\quad}$

4. $9 - 4 = \underline{\quad}$

10. $6 - 0 = \underline{\quad}$

5. $19 - 7 = \underline{\quad}$

11. $18 - 3 = \underline{\quad}$

6. $13 - 4 = \underline{\quad}$

12. $14 - 5 = \underline{\quad}$

Division

OBJECTIVE: Using objects to show division.

LEARNING TO SHARE EQUALLY.

6 oranges are shared equally among 2 boys.

Each boy gets 3 oranges.

$$6 \div 2 = 3$$

$\div$ This is the sign for division.

6 bananas are shared equally among 3 girls.

$$6 \text{ bananas} \div 3 \text{ girls} = 2 \text{ bananas.}$$

Each girl gets 2 bananas.

Let Us Read

OBJECTIVE: Division by grouping.

John is cleaning up the boys' room.
He has to put 9 shirts into 3 groups.
9 shirts are divided into 3 equal groups.

Each group will have 3 shirts.

Write $9 \div 3 = 3$

Let's see what John has done. He has 3 groups.

Step 1: He puts 1 shirt in each group.

Group A

Group B

Group C

Step 2: He puts 1 more shirt in each group.

Step 3: Then he puts 1 more shirt in each group.

Each group now has 3 shirts.

DIVISION

1. There are 6 marbles. They are shared equally by 3 boys. How many marbles does each boy get?

Each boy gets _____ marbles.

2. There are 15 tennis balls to be packed into 5 boxes equally. How many tennis balls will go into each box?

Each box will have _____ tennis balls.

3. Mrs. Jones has 20 apples to make pies. If she uses 4 apples to make one pie, how many apple pies does she make with 20 apples?

She makes _____ apple pies.

4. Divide 18 pineapples into 3 equal groups.

There are _____ pineapples in each group.

5. Divide 20 aeroplanes into 5 equal groups.

There are _____ aeroplanes in each group.

Solve the following:

1. $8 \div 2 = \underline{\quad}$

2. $4 \div 2 = \underline{\quad}$

3. $6 \div 2 = \underline{\quad}$

4. $6 \div 3 = \underline{\quad}$

5. $9 \div 3 = \underline{\quad}$

6. $3 \div 3 = \underline{\quad}$

7. $15 \div 3 = \underline{\quad}$

8. $16 \div 4 = \underline{\quad}$

9. $20 \div 4 = \underline{\quad}$

10. $12 \div 3 = \underline{\quad}$

NUMERALS 500 – 800

500

DIVISION

OBJECTIVE: Solving division with single digit divisor.

Write the answer to the problem then colour according to the key at the bottom.

Addition

OBJECTIVE: Addition of 3-digit numbers.

ADDITION WORDS

Addend		Sum/Total
3	– Addend	Addend + Addend = Sum
+ 3	– Addend	
6	– Sum or Total	

1. Add 2 to each of the following:

- | | | | |
|------|-------|-------|-------|
| a) 3 | d) 7 | g) 15 | j) 36 |
| b) 4 | e) 10 | h) 17 | k) 56 |
| c) 5 | f) 13 | i) 44 | l) 25 |

2-DIGIT NUMBERS TO 3-DIGIT NUMBERS (WITHOUT RENAMING)

Start at the ones column first.

1. $167 + 30$

$$\begin{array}{r} 167 \\ + 30 \\ \hline \end{array}$$

2. $337 + 42$

$$\begin{array}{r} 337 \\ + 42 \\ \hline \end{array}$$

3. $361 + 14$

$$\begin{array}{r} 361 \\ + 14 \\ \hline \end{array}$$

ADDITION

$$\begin{array}{r} 4. \quad 457 + 12 \\ \quad 457 \\ + \quad 12 \\ \hline \end{array}$$

$$\begin{array}{r} 5. \quad 245 + 42 \\ \quad 245 \\ + \quad 42 \\ \hline \end{array}$$

$$\begin{array}{r} 6. \quad 504 + 65 \\ \quad 504 \\ + \quad 65 \\ \hline \end{array}$$

$$\begin{array}{r} 7. \quad 116 + 32 \\ \quad 116 \\ + \quad 32 \\ \hline \end{array}$$

$$\begin{array}{r} 8. \quad 163 + 33 \\ \quad 163 \\ + \quad 33 \\ \hline \end{array}$$

$$\begin{array}{r} 9. \quad 251 + 48 \\ \quad 251 \\ + \quad 48 \\ \hline \end{array}$$

$$\begin{array}{r} 10. \quad 167 + 32 \\ \quad 167 \\ + \quad 32 \\ \hline \end{array}$$

$$\begin{array}{r} 11. \quad 235 + 43 \\ \quad 235 \\ + \quad 43 \\ \hline \end{array}$$

$$\begin{array}{r} 15. \quad 253 + 25 \\ \quad 253 \\ + \quad 25 \\ \hline \end{array}$$

$$\begin{array}{r} 16. \quad 111 + 12 \\ \quad 111 \\ + \quad 12 \\ \hline \end{array}$$

$$\begin{array}{r} 17. \quad 153 + 42 \\ \quad 153 \\ + \quad 42 \\ \hline \end{array}$$

$$\begin{array}{r} 18. \quad 118 + 41 \\ \quad 118 \\ + \quad 41 \\ \hline \end{array}$$

$$\begin{array}{r} 19. \quad 203 + 53 \\ \quad 203 \\ + \quad 53 \\ \hline \end{array}$$

$$\begin{array}{r} 20. \quad 138 + 20 \\ \quad 138 \\ + \quad 20 \\ \hline \end{array}$$

$$\begin{array}{r} 21. \quad 716 + 33 \\ \quad 716 \\ + \quad 33 \\ \hline \end{array}$$

$$\begin{array}{r} 22. \quad 168 + 21 \\ \quad 168 \\ + \quad 21 \\ \hline \end{array}$$

$$\begin{array}{r} 23. \quad 275 + 24 \\ \quad 275 \\ + \quad 24 \\ \hline \end{array}$$

$$\begin{array}{r} 24. \quad 152 + 34 \\ \quad 152 \\ + \quad 34 \\ \hline \end{array}$$

OBJECTIVE: Addition of 3-digit numbers without renaming.

ADDITION OF 3-DIGIT NUMBERS

(WITHOUT RENAMING)

The first one has been done for you.

1. $355 + 123$

$$\begin{array}{r} 355 \\ + 123 \\ \hline 478 \end{array}$$

2. $617 + 212$

$$\begin{array}{r} 617 \\ + 212 \\ \hline \end{array}$$

3. $548 + 131$

$$\begin{array}{r} 548 \\ + 131 \\ \hline \end{array}$$

4. $462 + 136$

$$\begin{array}{r} 462 \\ + 136 \\ \hline \end{array}$$

5. $572 + 226$

$$\begin{array}{r} 572 \\ + 226 \\ \hline \end{array}$$

6. $385 + 103$

$$\begin{array}{r} 385 \\ + 103 \\ \hline \end{array}$$

7. $187 + 410$

$$\begin{array}{r} 187 \\ + 410 \\ \hline \end{array}$$

8. $383 + 212$

$$\begin{array}{r} 383 \\ + 212 \\ \hline \end{array}$$

9. $122 + 315$

$$\begin{array}{r} 122 \\ + 315 \\ \hline \end{array}$$

10. $314 + 215$

$$\begin{array}{r} 314 \\ + 215 \\ \hline \end{array}$$

11. $260 + 120$

$$\begin{array}{r} 260 \\ + 120 \\ \hline \end{array}$$

12. $301 + 250$

$$\begin{array}{r} 301 \\ + 250 \\ \hline \end{array}$$

ADDITION

13. $187 + 110$

$$\begin{array}{r} 187 \\ + 110 \\ \hline \end{array}$$

14. $190 + 200$

$$\begin{array}{r} 190 \\ + 200 \\ \hline \end{array}$$

15. $222 + 352$

$$\begin{array}{r} 222 \\ + 352 \\ \hline \end{array}$$

ADDING 3-DIGIT NUMBERS

(WITHOUT RENAMING)

1. $202 + 362$

$$\begin{array}{r} 202 \\ + 362 \\ \hline \end{array}$$

2. $324 + 610 = \underline{\hspace{2cm}}$

3. $287 + 412 = \underline{\hspace{2cm}}$

4. $563 + 402 = \underline{\hspace{2cm}}$

5. $450 + 128 = \underline{\hspace{2cm}}$

6. $433 + 250 = \underline{\hspace{2cm}}$

7. $125 + 334 = \underline{\hspace{2cm}}$

8. $428 + 121 = \underline{\hspace{2cm}}$

9. $650 + 217 = \underline{\hspace{2cm}}$

10. $303 + 426 = \underline{\hspace{2cm}}$

11. $515 + 403 = \underline{\hspace{2cm}}$

12. $272 + 315 = \underline{\hspace{2cm}}$

13. $801 + 156 = \underline{\hspace{2cm}}$

14. $231 + 226 = \underline{\hspace{2cm}}$

OBJECTIVE: Addition of 2-digit numbers with renaming.

ADDITION: RENAMING

In addition, we always begin at the ones column.

Look at this example.

$$36 + 56$$

Tens	Ones
¹ 3	6
+ 5	6
9	2

First, add all the ones and then rename.

$$6 + 6 = 12 \text{ ones} = 1 \text{ ten and } 2 \text{ ones}$$

Put the 2 in the ones column and carry the 1 ten to the tens column.

When you add the tens column remember to add in the 1 ten that you carried from the ones column.

The 1 ten carried from the ones column, add with the other tens.

Tens	Ones	Tens	Ones
¹ 3	6	1	2
+ 5	6		
9	2		

14. $848 + 23 =$
 15. $356 + 206 =$

16. $464 + 18 =$

OBJECTIVE: Addition of 3-digit numbers with renaming.

ADDING 3-DIGIT NUMBERS (RENAMING)

Example: 1. $179 + 352$

	H	T	O
179	1	7	9
$+ 352$			
	5	3	1

Step 2: Add the tens.
 5 tens + 7 tens + 1 ten brought over from the ones place. This makes 13 tens. Put the 3 under the tens place and take the 1 hundred over to the hundreds place.

Step 1: Add the ones.
 9 ones + 2 ones = 11 ones
 1 ten and 1 one. Put the 1 (one) under the ones place. Take the 1 ten over to the tens place.

Step 3: Add the hundreds.
 3 hundreds + 1 hundred + the 1 hundred carried over from the tens place = 5 hundreds. Put the hundreds under the hundreds place.

Now do these problems. Show all working in your notebook.

- | | | |
|------------------|------------------|------------------|
| 1. $293 + 137 =$ | 4. $564 + 177 =$ | 7. $228 + 353 =$ |
| 2. $356 + 356 =$ | 5. $126 + 126 =$ | 8. $845 + 185 =$ |
| 3. $422 + 188 =$ | 6. $306 + 506 =$ | 9. $168 + 168 =$ |

LET'S DO SOME MENTAL ADDITION.

Add mentally

Fill in the blank (copy and do in your notebook).

- | | |
|----------------------|----------------------|
| 1. $26 + 4 =$ _____ | 3. $549 + 5 =$ _____ |
| 2. $238 + 5 =$ _____ | 4. $341 + 6 =$ _____ |

ADDITION

Begin at the ones column.

$$\begin{array}{r} 1. \quad 53 \\ + 37 \\ \hline \end{array}$$

$$\begin{array}{r} 5. \quad 28 \\ + 14 \\ \hline \end{array}$$

$$\begin{array}{r} 9. \quad 34 \\ + 17 \\ \hline \end{array}$$

$$\begin{array}{r} 2. \quad 65 \\ + 15 \\ \hline \end{array}$$

$$\begin{array}{r} 6. \quad 53 \\ + 29 \\ \hline \end{array}$$

$$\begin{array}{r} 10. \quad 25 \\ + 65 \\ \hline \end{array}$$

$$\begin{array}{r} 3. \quad 76 \\ + 16 \\ \hline \end{array}$$

$$\begin{array}{r} 7. \quad 72 \\ + 18 \\ \hline \end{array}$$

$$\begin{array}{r} 11. \quad 47 \\ + 17 \\ \hline \end{array}$$

$$\begin{array}{r} 4. \quad 53 \\ + 17 \\ \hline \end{array}$$

$$\begin{array}{r} 8. \quad 16 \\ + 17 \\ \hline \end{array}$$

$$\begin{array}{r} 12. \quad 29 \\ + 13 \\ \hline \end{array}$$

ADDITION OF 2-DIGIT NUMBERS TO 3-DIGIT NUMBERS (RENAMING)

Begin at the ones column. Look at the example.

$$\begin{array}{r} 1. \quad 768 + 22 = 7 \overset{1}{6} 8 \\ \quad \quad \quad + 22 \\ \quad \quad \quad 790 \end{array} \quad \begin{array}{cc} \text{Tens} & \text{Ones} \\ 1 & 0 \end{array}$$

$$2. \quad 906 + 86 =$$

$$8. \quad 925 + 15 =$$

$$3. \quad 269 + 33 =$$

$$9. \quad 427 + 27 =$$

$$4. \quad 148 + 22 =$$

$$10. \quad 138 + 15 =$$

$$5. \quad 258 + 22 =$$

$$11. \quad 337 + 35 =$$

$$6. \quad 153 + 27 =$$

$$12. \quad 155 + 27 =$$

$$7. \quad 342 + 18 =$$

$$13. \quad 536 + 25 =$$

Multiplication

OBJECTIVE: Multiplication by grouping.

GROUPING

1 group of 1 = 1
one 1 = 1

2 groups of 1s = 2
two 1s = 2

3 groups of 1s = ____

three ____ is = ____

6 groups of 1s = ____

six ____ is = ____

2 groups of 2 are the same as 2 groups, or 2 sets of 2 things.

$$2 \times 2 = 4$$

2 groups of 6 = ____

2 x 6 = ____

ADDITION

5. $64 + 16 =$ _____

6. $55 + 9 =$ _____

7. $26 + 12 =$ _____

8. $88 + 12 =$ _____

9. $623 + 5 =$ _____

10. $864 + 100 =$ _____

Mental Subtraction

Fill in the blanks (copy and do in your notebook)

1. $655 - 50 =$ _____

2. $76 - 12 =$ _____

3. $38 - 15 =$ _____

4. $791 - 9 =$ _____

5. 8 less than 50 is _____

6. $300 - 28 =$ _____

7. $540 - 80 =$ _____

8. $392 - 30 =$ _____

9. $826 - 80 =$ _____

10. $400 - 200 =$ _____

Activity:

1. Answer the questions.

a) What number is 3 less than 420?

b) What number is 4 more than 578?

c) What number is 100 less than 780?

2. Count backwards to find the numbers that are missing.

a) 81, 84, 87, _____, _____, _____, 99

b) 467, 567, _____, _____, _____

c) 72, 74, _____, _____, _____

3. Count on to find the missing numbers.

a) 1 more than 546 is _____.

b) 268, 368, _____, 568, _____, _____.

c) 2 more than 462 is _____.
